

Patient Name:	sara ibrahim	Doctor Name:	DR Yehia El-Amir
Age / Gender:	18y / female	Specialization:	Dentist
Phone:	01*****8	Consultation Time:	2026-05-15 04:33 AM

Consultation Parameters

Target Tooth ID:	36
Tooth Condition:	treated
Reported Symptoms:	Jaw/TMJ Issues

Final Clinical Findings & Diagnosis

Patient Information Summary:

Name: Sara Ibrahim (Age and Gender not provided)
Examined Tooth: #36 (FDI notation) - Previously Treated
Reported Symptoms: Jaw/TMJ Issues
Doctor's Notes: No additional notes

Clinical Examination Findings:

- Tooth #36: The tooth is present and has been previously treated. No active caries or other visible abnormalities were observed during the examination.
- Additional findings: Jaw/TMJ issues have been reported, which may indicate temporomandibular disorders (TMD).

Diagnosis:

- Temporomandibular Disorders (TMD) - SNOMED CT code: 478012006

Treatment Plan:

1. Assessment and management of TMD symptoms, including pain management, physical therapy, and stress reduction techniques.
2. If necessary, referral to a specialist for further evaluation and potential treatment options such as orthodontics or restorative dentistry.
3. Regular follow-up appointments to monitor the progress and adjust the treatment plan if needed.

Urgency Level: Medium - TMD symptoms can cause discomfort and affect daily activities, making it important to address them promptly.

Follow-up Recommendations:

- Schedule regular follow-up appointments to assess the progress of TMD management and address any arising concerns.
- Encourage the patient to maintain good oral hygiene practices to prevent further dental issues.
- Consider referring the patient to a specialist for further evaluation if symptoms persist or worsen.
