Phone: 01234568910

Doctor Name: DR Yehia El-Amir
Specialization: Dentist
Consultation Time: 2026-05-15 05:28 AM

Consultation Parameters

Target Tooth ID: 25
Tooth Condition: treated
Reported Symptoms: Bleeding Gums, Defective Restoration, Tooth Mobility, Stained Teeth

Final Clinical Findings & Diagnosis

Patient Information Summary:

Name: Ahmed Baha
Age: 21
Gender: Male
Date of Examination: [Insert Date]

Clinical Examination Findings:

- Tooth #25 (FDI notation): Treated tooth with reported symptoms of bleeding gums, defective restoration, tooth mobility, and stained teeth.

Diagnosis:

- ICD-10: K06.09 (Periodontal abscess unspecified) - Due to bleeding gums and potential periodontal disease.
- SNOMED CT: 384572008 (Defective restoration of tooth) - Resulting from the reported defective restoration on tooth #25.
- ICD-10: K06.9 (Periodontal diseases, unspecified) - Given the symptoms of tooth mobility and stained teeth, indicative of potential periodontal disease.

Treatment Plan:

- Restorative treatment for tooth #25 to address the defective restoration and improve aesthetics.
- Scaling and root planing (SRP) to treat the bleeding gums and manage any potential periodontal disease.
- Evaluation of tooth mobility, if necessary, to determine if further restorative or endodontic treatment is required.

Urgency Level: Medium - The defective restoration and bleeding gums require attention to prevent further complications.

Follow-up Recommendations:

- Schedule a follow-up appointment for the recommended treatments, ideally within 2 weeks of the initial consultation.
- Encourage the patient to maintain good oral hygiene practices at home, including brushing twice daily and flossing once

daily.

- Advise the patient to return for regular checkups every six months to monitor tooth #25 and overall dental health.

Patient-Friendly Advice & Explanation

****Your Dental Exam Results, Ahmed:****

Hello Ahmed, here's what we found during your recent dental exam:

- Tooth #25 (the one towards the back on the right side): It has some issues like bleeding gums, a damaged filling, loose tooth, and stained teeth.

****What This Means:****

The damage to your tooth and the bleeding gums might be signs of a problem called periodontal disease. We also found that your filling needs to be replaced for better appearance.

****What We Recommend:****

We suggest fixing your filling (restorative treatment) and cleaning your teeth deeply (scaling and root planing, or SRP) to help with the bleeding gums and potential periodontal disease. If needed, we'll check the loose tooth to decide if additional treatments are required.

****What You Should Do At Home:****

- Schedule a follow-up appointment for these treatments within 2 weeks of this consultation.
- Brush your teeth twice daily and floss once daily at home to keep your mouth clean.
- Come back every six months for regular checkups to monitor tooth #25 and your overall dental health.

Stay well, Ahmed! We'll see you soon.
