Age / Gender:	77y / Female	Specialization:	Dentist
Phone / Blood Type:	012369852017 (Blood: Unknown)	Consultation Time:	2026-05-18 12:06 AM

Consultation Parameters

Target Tooth ID:	11
Tooth Condition:	healthy
Reported Symptoms:	Fractured/Chipped

Final Clinical Findings & Diagnosis

Patient Information Summary

Name: Jana Ahmed
Age: 77
Gender: Female
Visit Date: [Insert Visit Date]
Appointment Type: Dental Consultation

Clinical Examination Findings

- Tooth #11 (FDI notation): Healthy tooth structure present, however, fractured or chipped symptom reported.
- Problem teeth: #12, 17, 24, 26, 27, 43, 45, 47, 48 exhibit signs of decay or fillings in need of replacement.
- Previously treated teeth: #15, 16, and 36 have undergone dental procedures.
- Missing teeth: #18, 25, 33, 35, 38, and 44 are absent from the oral cavity.

Diagnosis

- Tooth #11 (FDI notation): No diagnosis as tooth is healthy, but fractured or chipped symptom reported.
- Problem teeth: Diagnosis of dental caries or decay for teeth #12, 17, 24, 26, 27, 43, 45, 47, and 48.
- Missing teeth: No diagnosis provided as they are already absent from the oral cavity.

ICD/SNOMED codes (where applicable):

- Dental caries (SNOMED CT: 169023005) for problem teeth #12, 17, 24, 26, 27, 43, 45, 47, and 48.

Treatment Plan

- Priority 1:
- Restoration of tooth #11 (FDI notation) with a composite filling to address the fractured or chipped symptom.

- Priority 2:
- Replacement of decayed fillings and treatment of dental caries for teeth #12, 17, 24, 26, 27, 43, 45, 47, and 48.

****Urgency Level****

- High: Restoration of tooth #11 (FDI notation) due to the reported fractured or chipped symptom.
- Medium: Replacement of decayed fillings and treatment of dental caries for teeth #12, 17, 24, 26, 27, 43, 45, 47, and 48.

****Follow-up Recommendations****

- Schedule a follow-up appointment to monitor the progress of tooth #11 (FDI notation) after restoration and assess the need for further treatment.
- Schedule additional appointments as needed for the treatment of problem teeth and replacement of missing teeth, if applicable.
- Encourage patient to maintain good oral hygiene practices at home, including brushing twice daily, flossing once daily, and using mouthwash.
- Recommend regular dental check-ups every six months for preventative care and early detection of any potential issues.
